BLOCKCHAIN DEVELOPER

Mathematics and Computer Science student at University of Manchester, First-year, who also likes to travel.

{Wonderpath}

Pitch

EASYA x POLKADOT
April 19–20, 2025

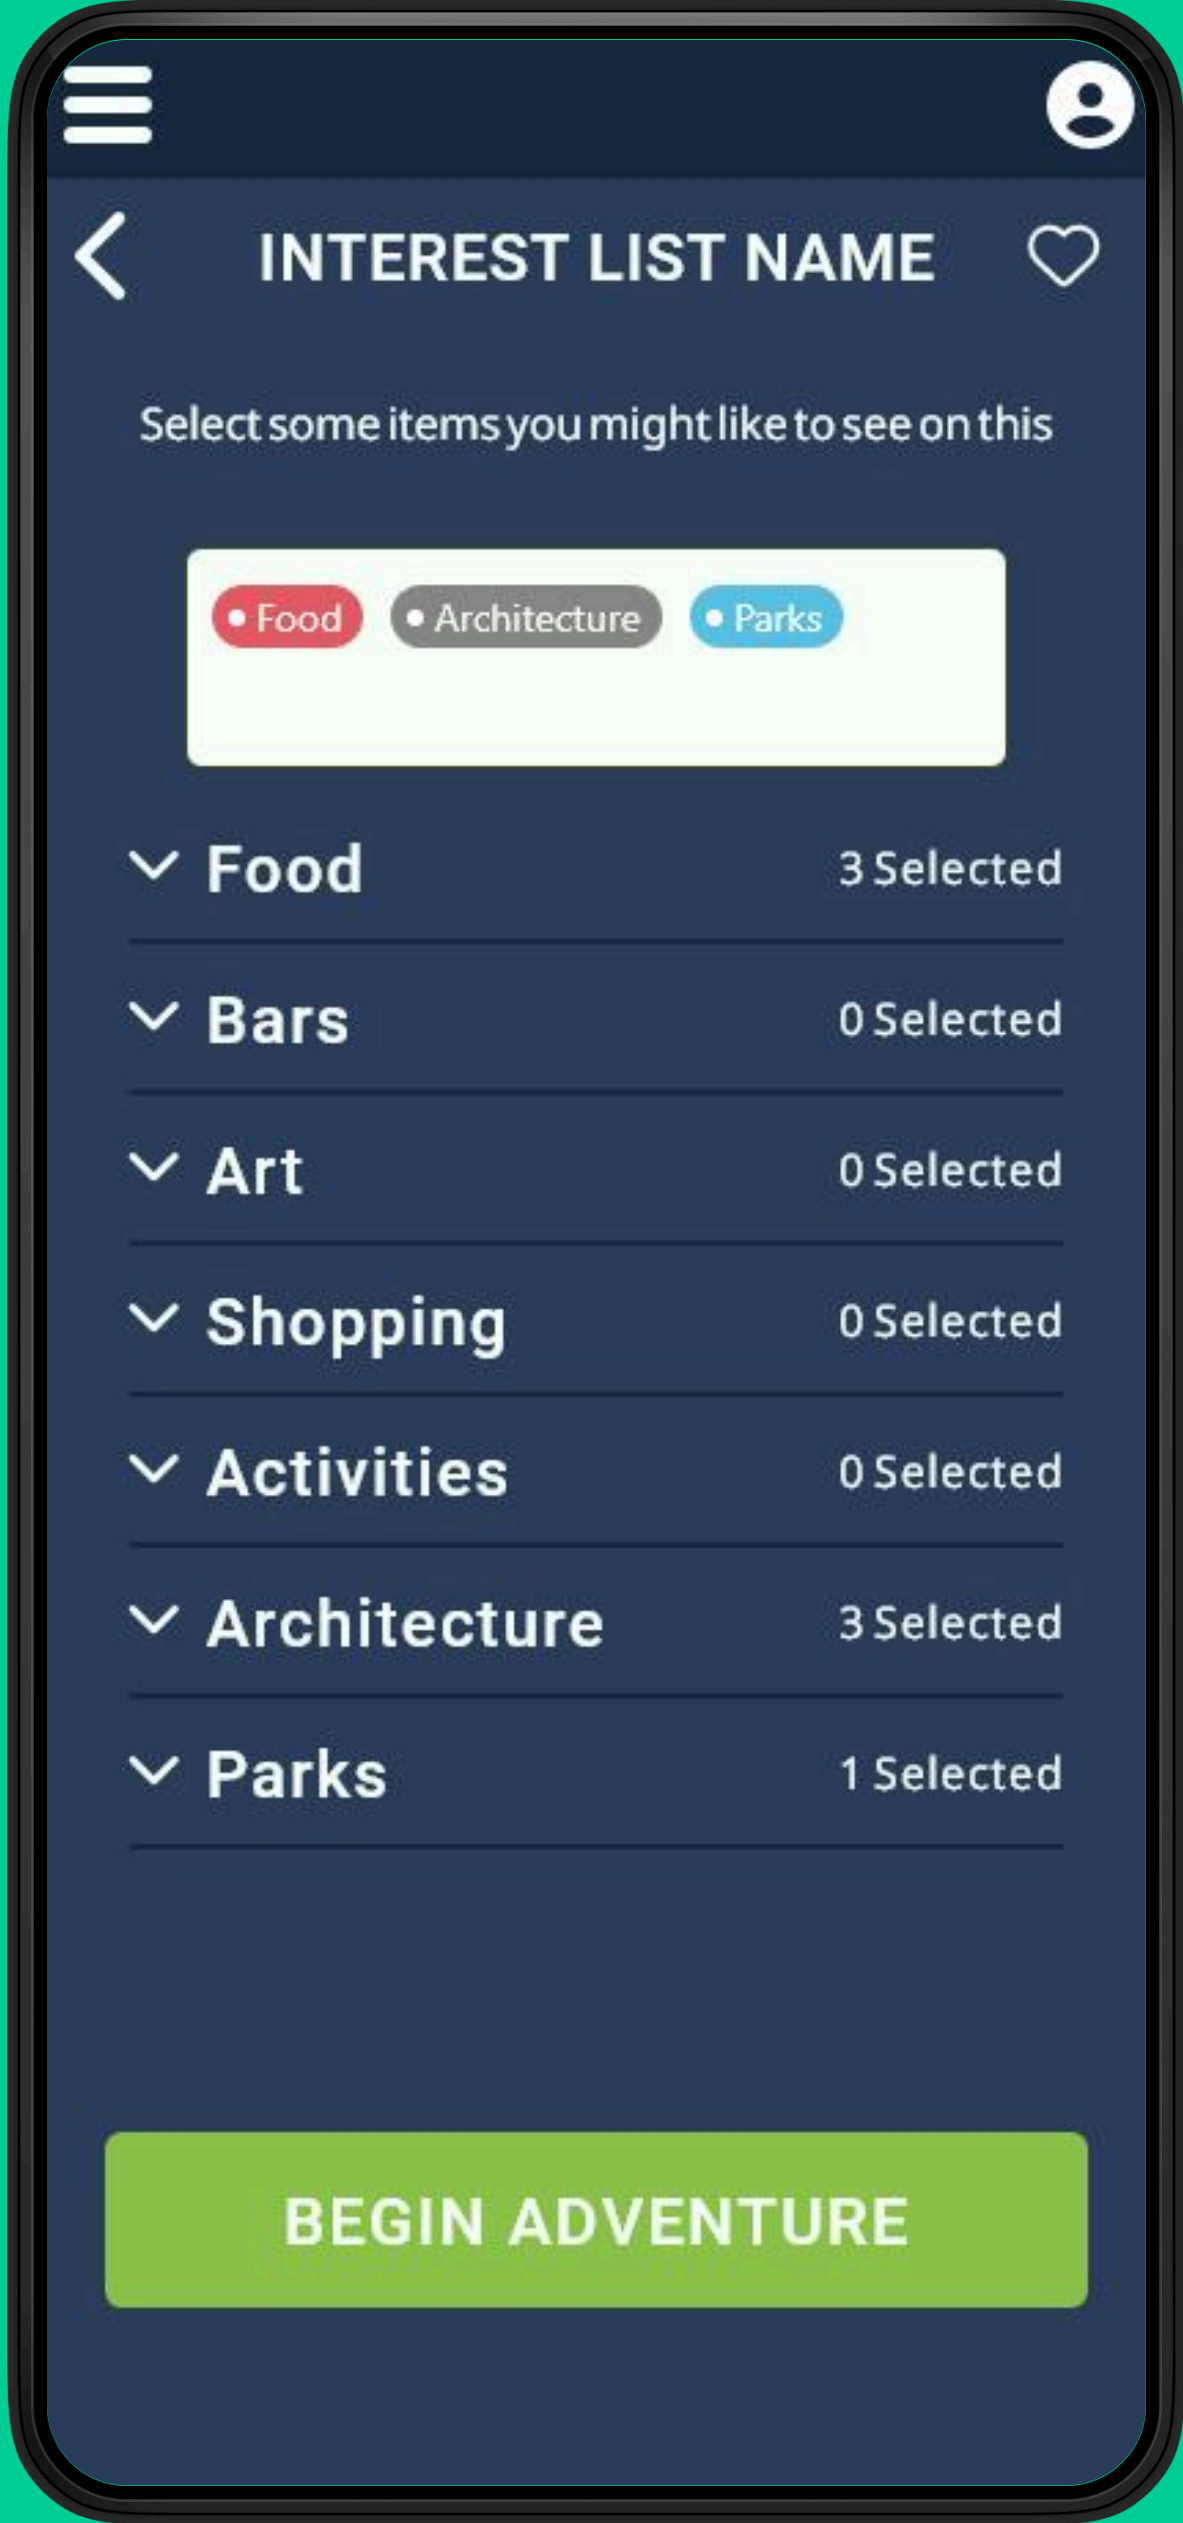

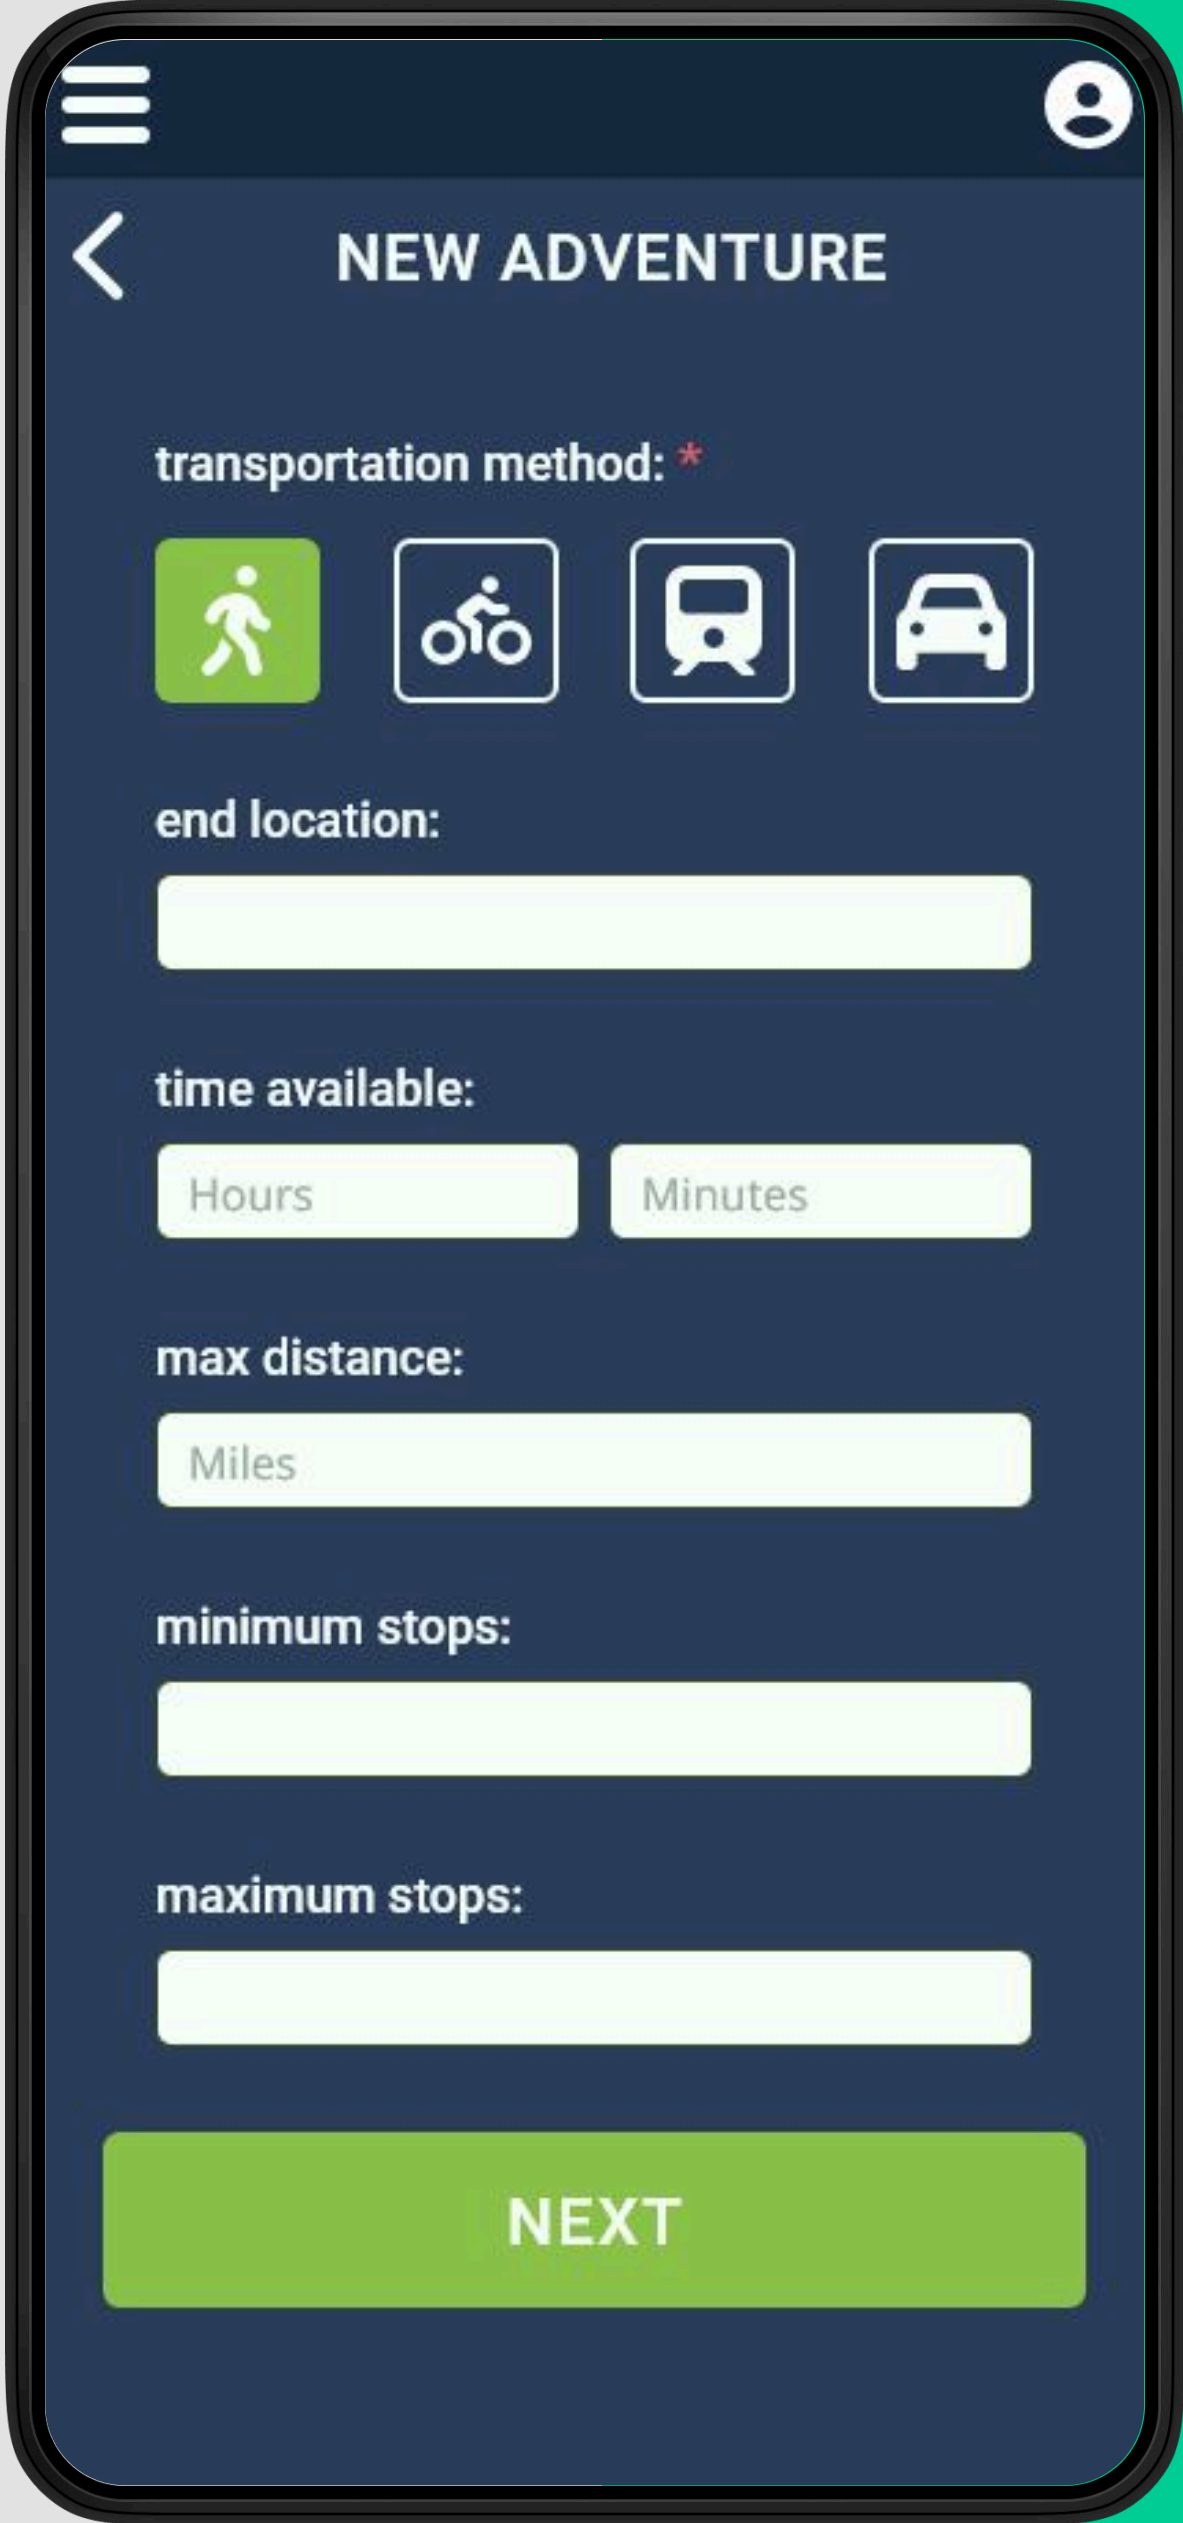

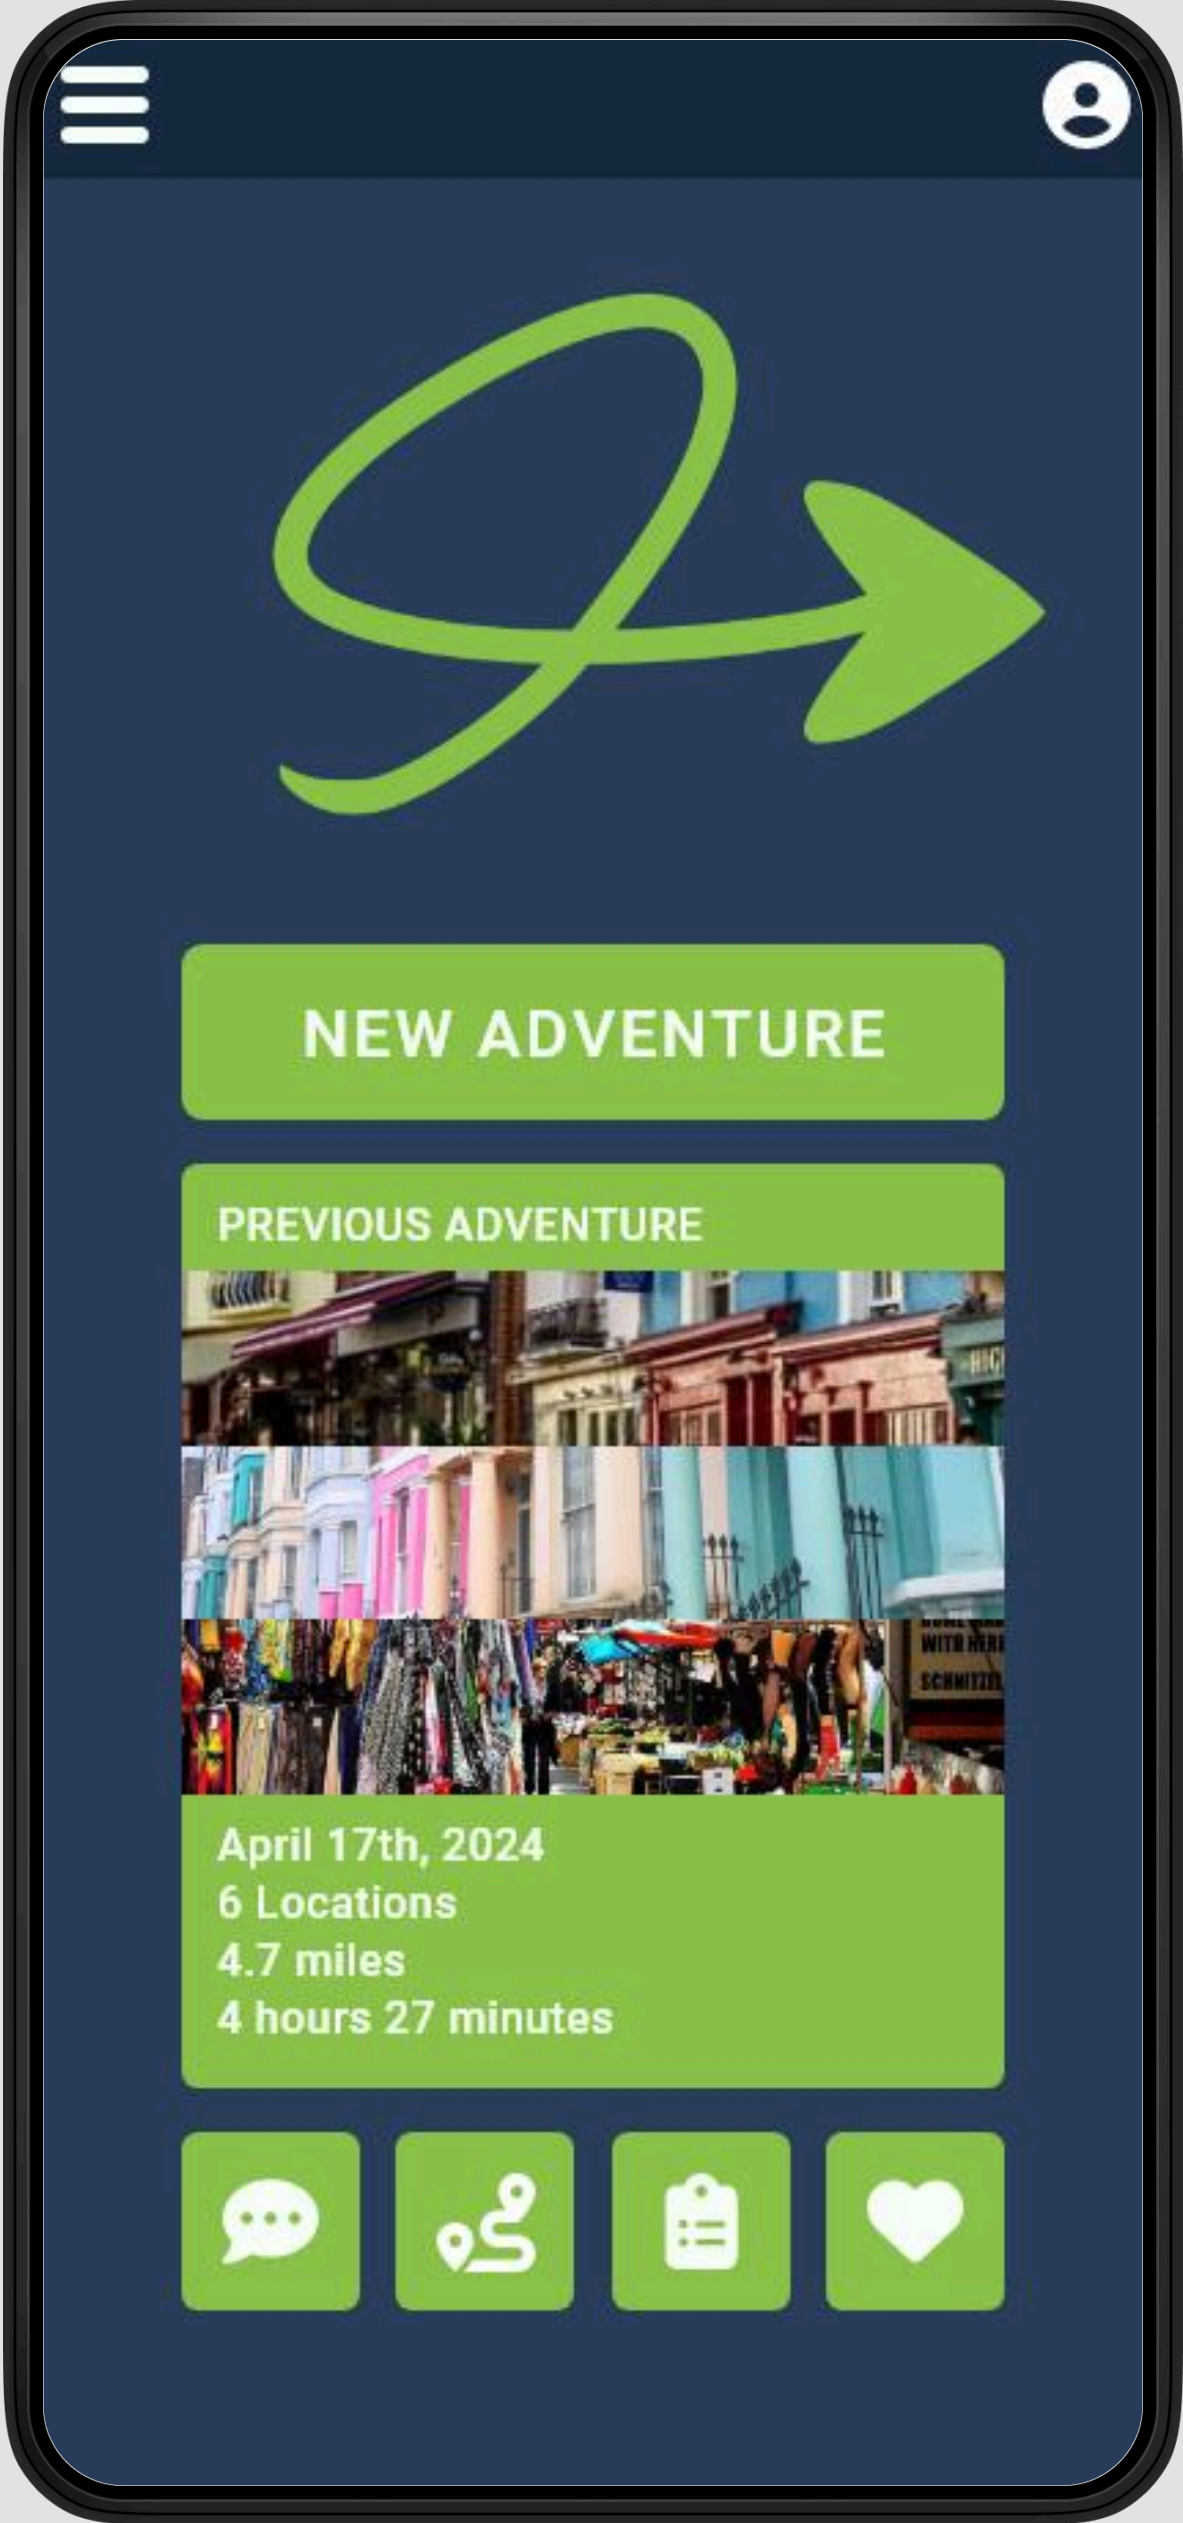

The story

Have you ever been to a place you didn't know with time to kill and nothing to do?

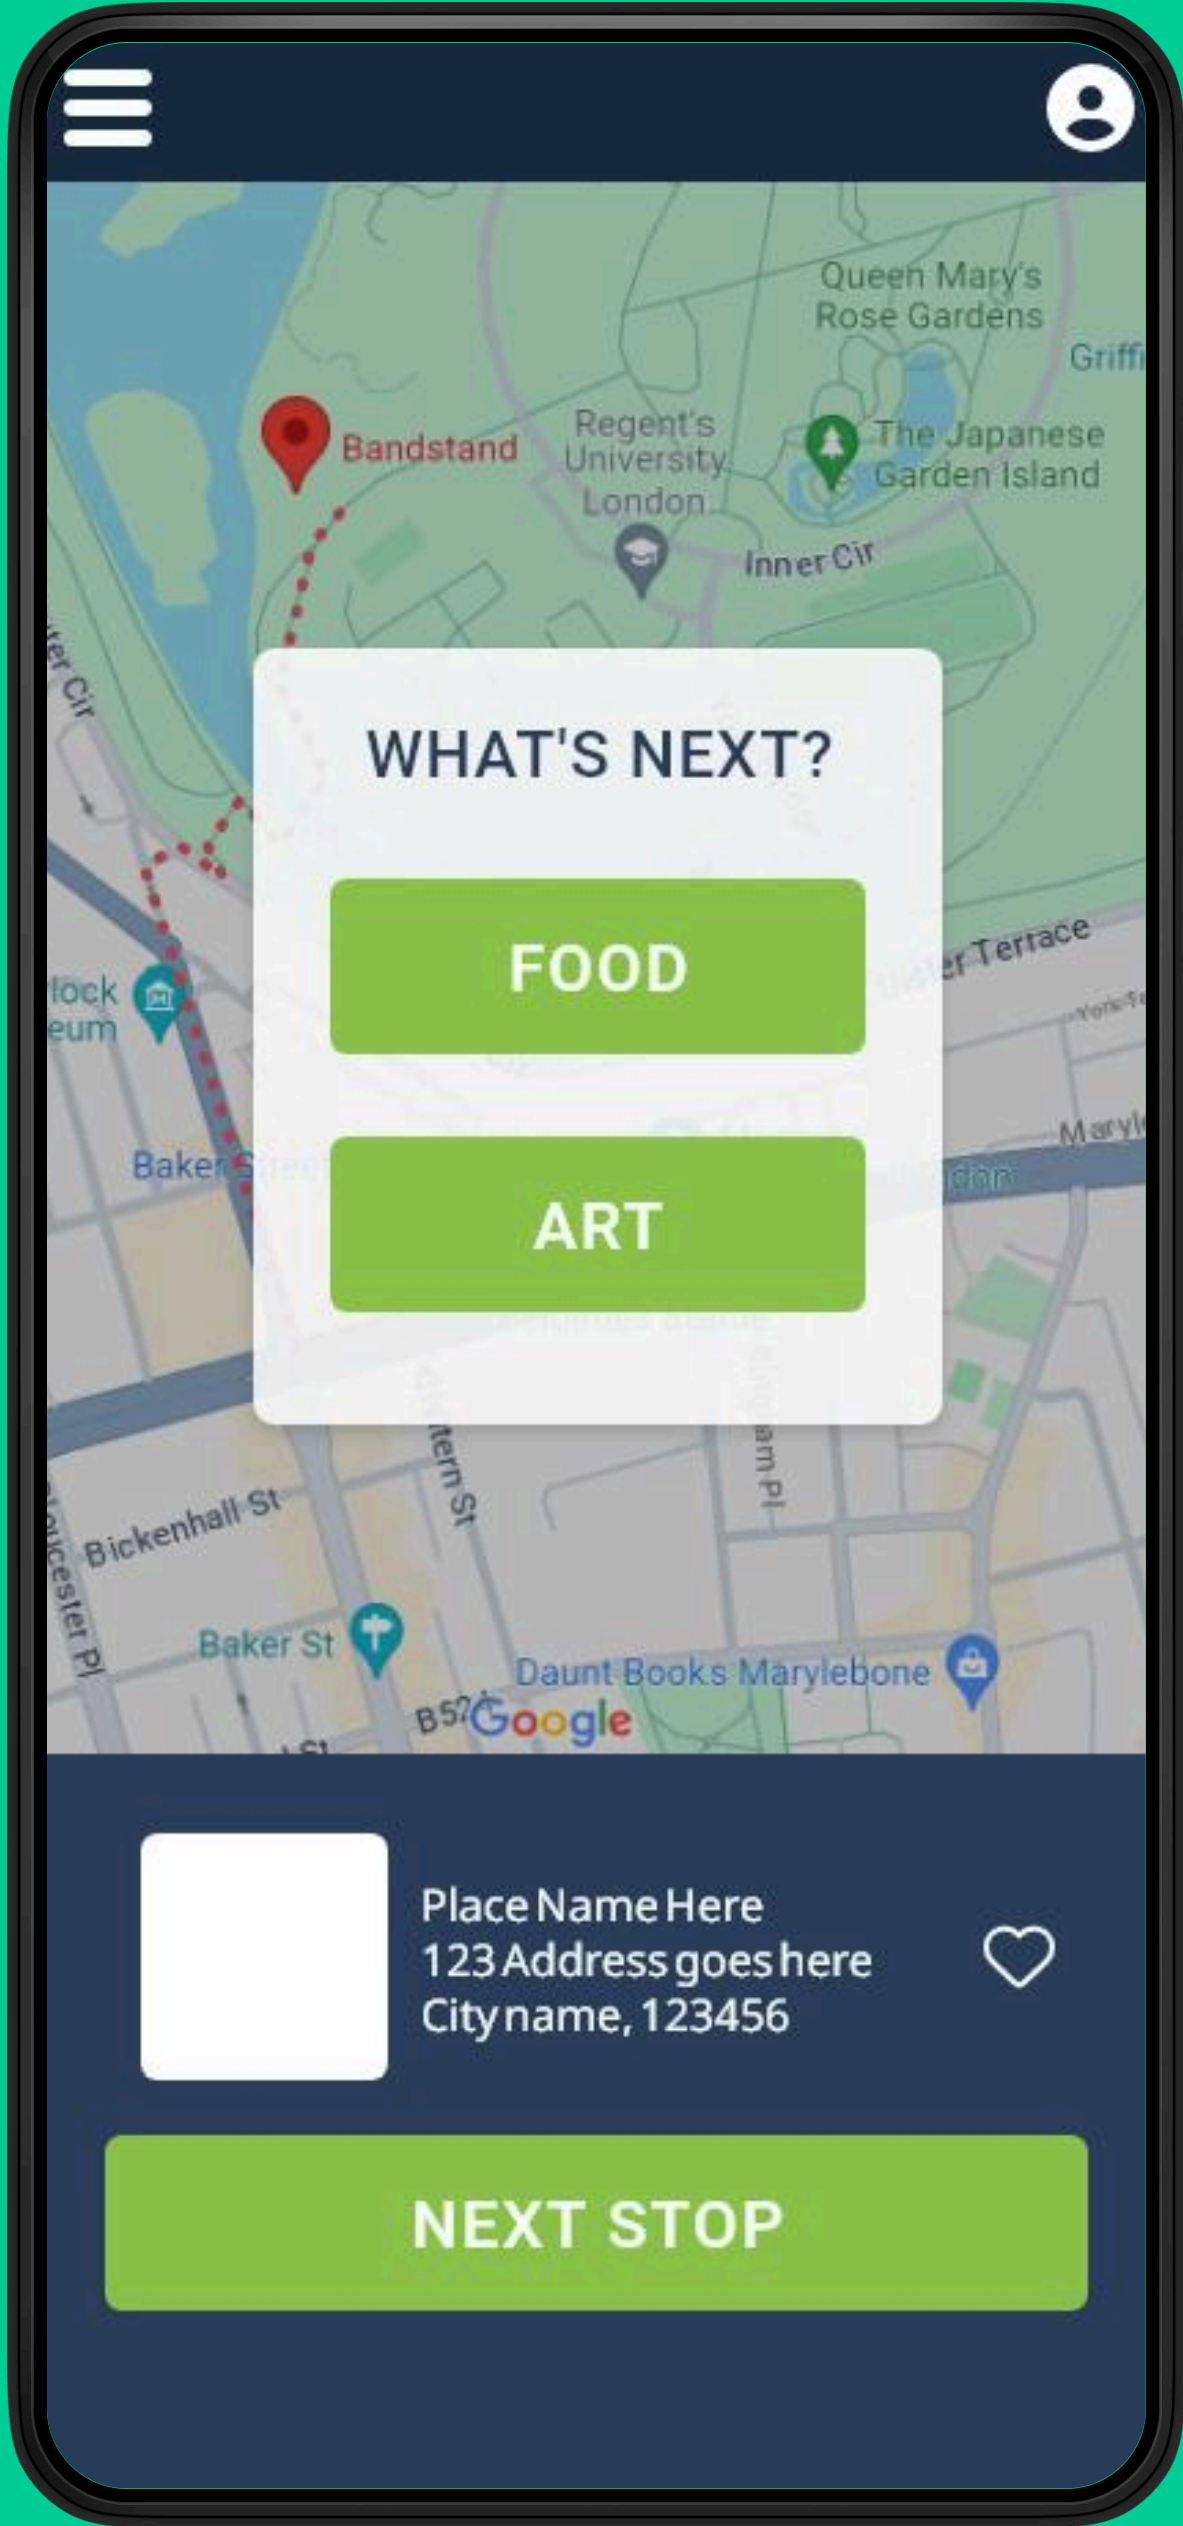

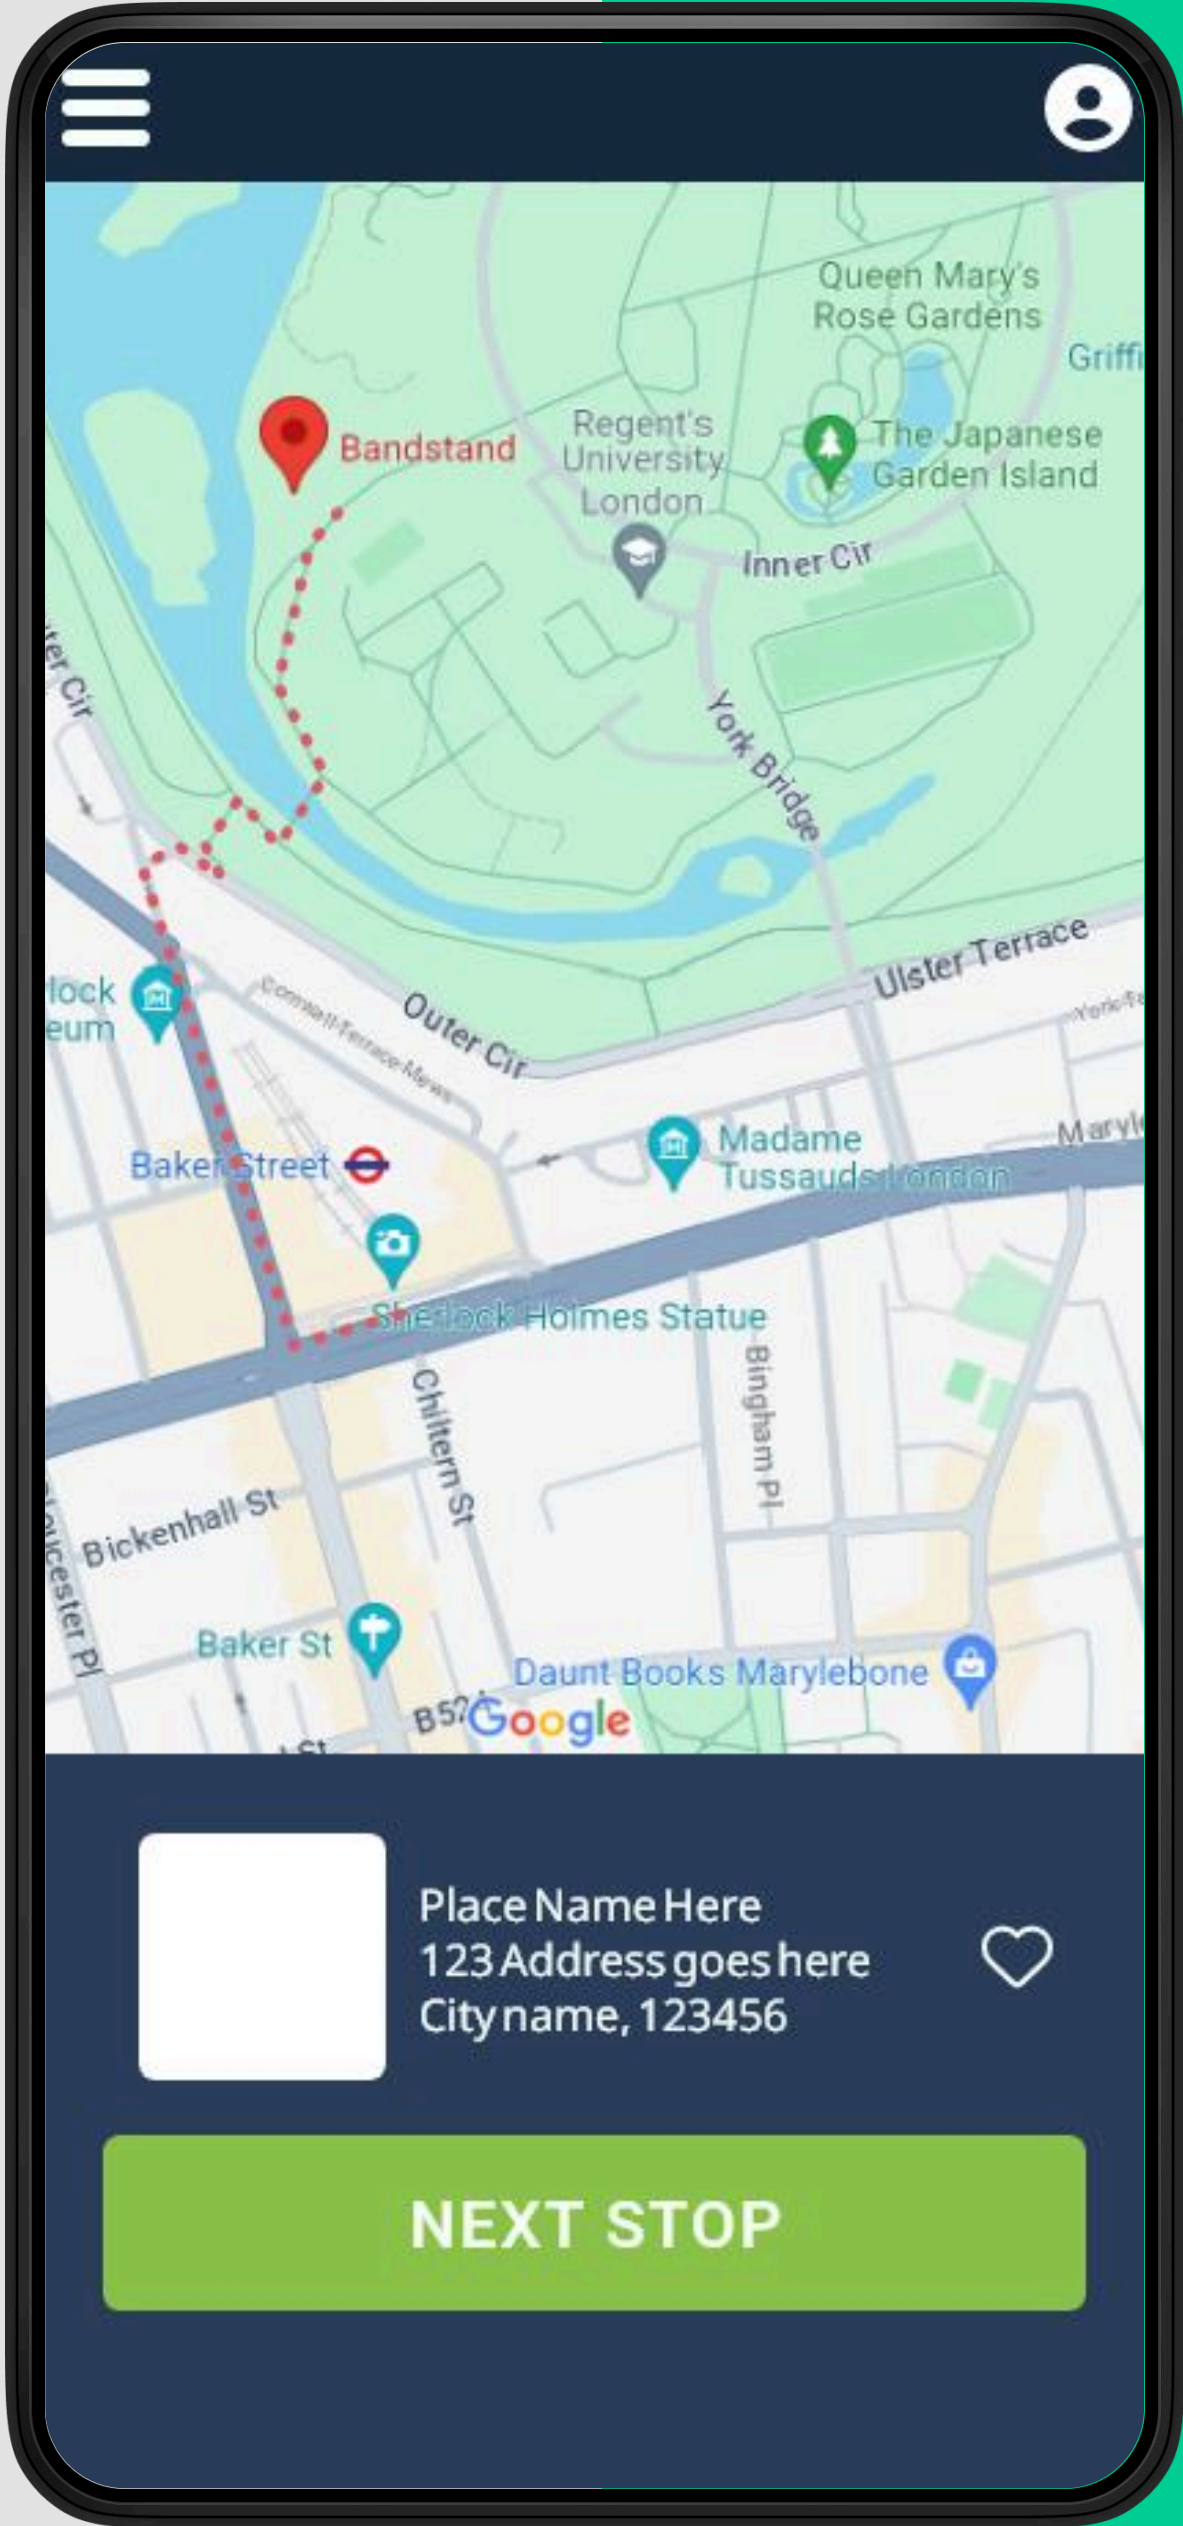

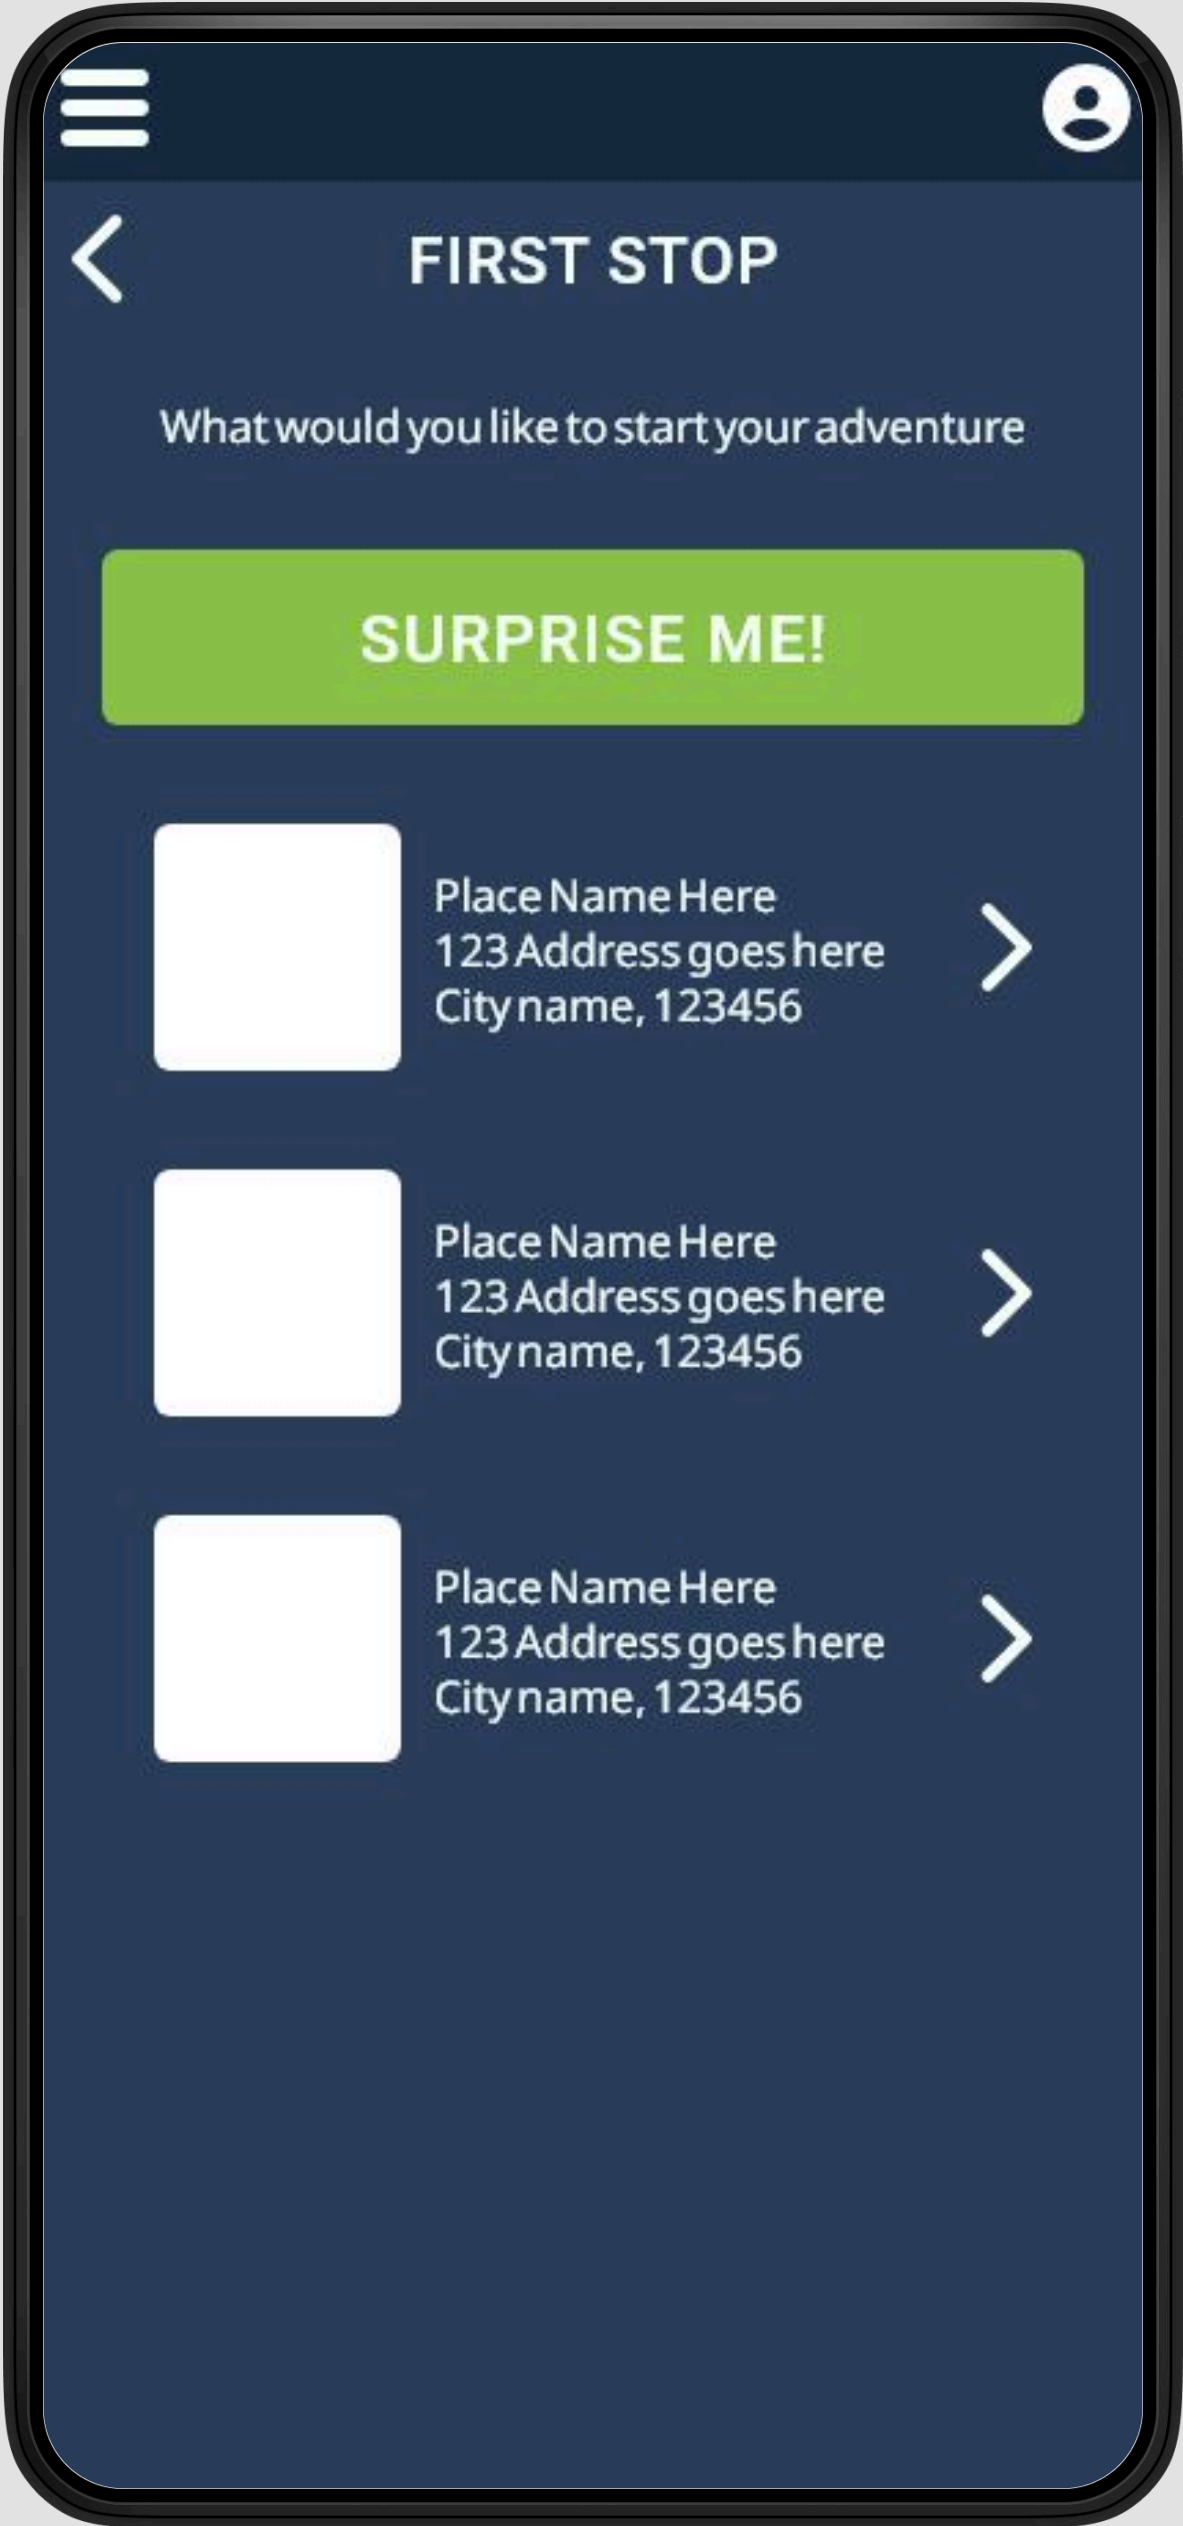

Or even in your own city with an empty afternoon.

The purpose of this app is to create an adventure based on your interests.

Our Solution

Our Solution

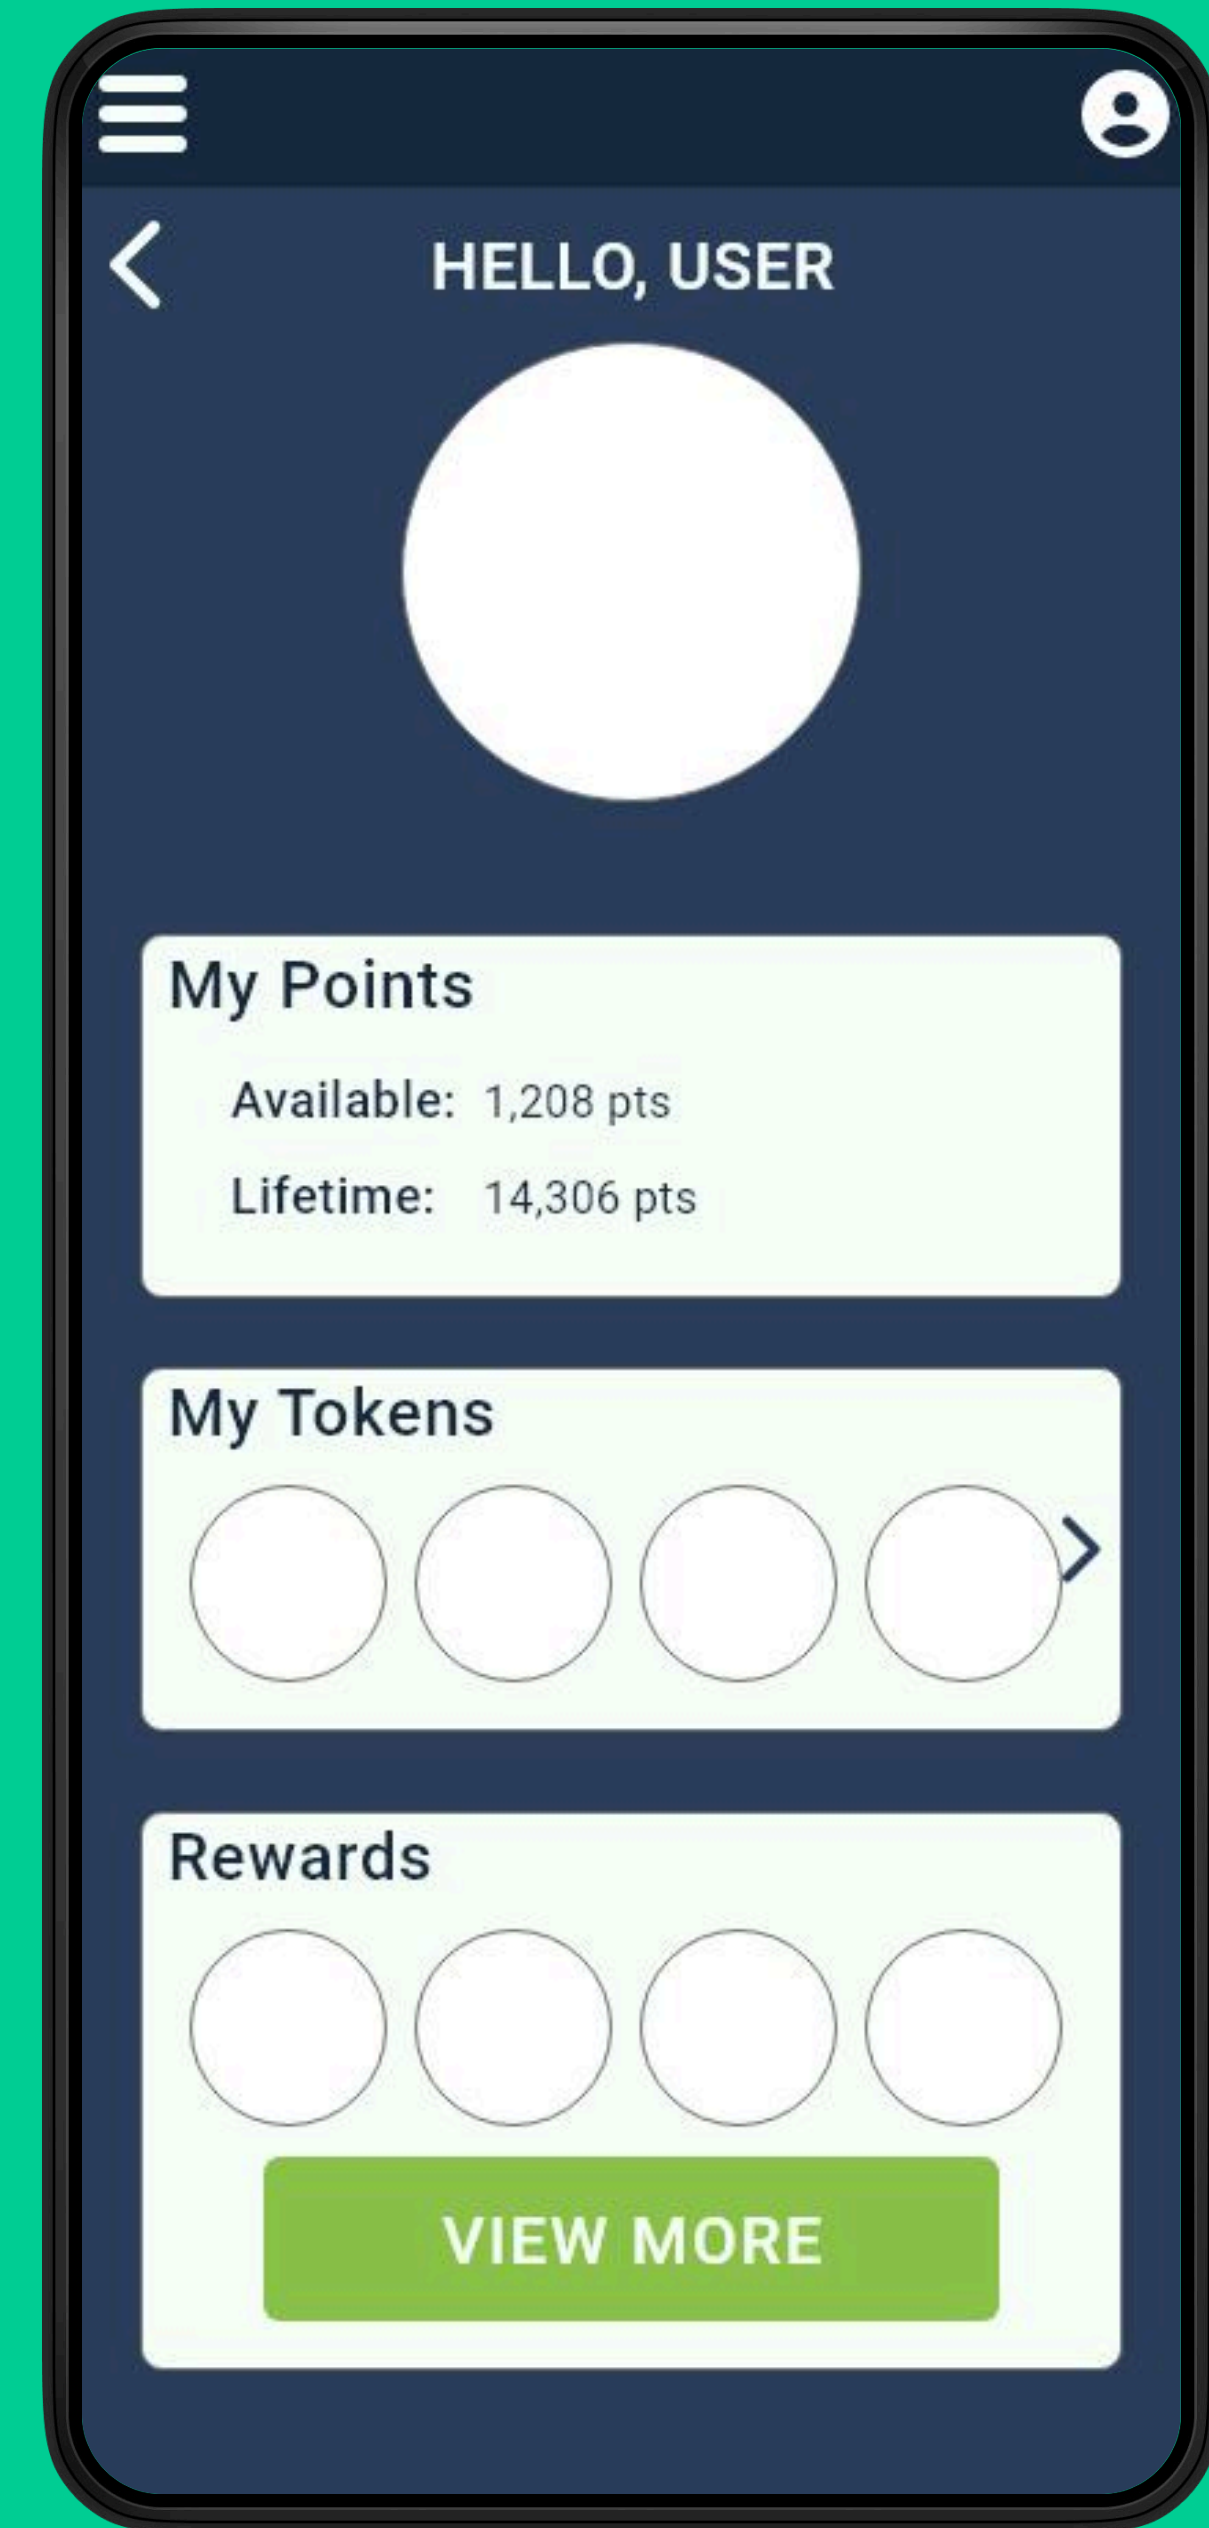

Our Solution

Blockchain Integrations

Users are able to earn points by visiting locations and going on adventures.

These points are redeemed for tokens that can be used at various businesses.

Why Polkadot

People explore cities
everyday without
incentives. This is where
Web3 and Polkadot allows
users to earn tokens
without Web2 tracking or
centralized control. It also
allows business owners to
encourage traffic to their
businesses.

Roadmap

Where do we go from here?

Future

Create an ecosystem where users can earn points by making suggestions for adventures that others can take.

AI

Integrate the ability for Wonderpath to learn from your other social media use to make better suggestions.
Use AI to verify user submitted locations, such as street art and murals.

Big Picture

Encourage users to get out and visit local spots to where they are, or explore less touristy locations while on holiday.

Thank you!
